- Who brilliantly will handle multiple data entry tasks and can contribute to constantly improve our online store. We are looking for a quick learner that can multitask and perform projects under tight deadlines. You need to be able to work under little supervision and be a team player.
- You know how to develop problem solutions by describing requirements in work-flowcharts and diagrams; study system capabilities and analyze alternative solutions.

### Your profile:

- You are structured, analytical and problem solving
- You have an eye for quality and process improvement.
- You are detail oriented and can easily get an overview over complex data
- Ability to research and gather reliable data and information
- Professionalism and creativity in content and presentation
- You're a team player, responsible and independent,
- Graduate/University student preferably in the field of Business, Mathematics, Finance, Physics or IT
- Proven competence by past experience in detail oriented tasks
- Confident communication skills and excellent English

### What You Can Expect from Us

- You'll be a part of a fresh, dynamic, and highly motivated team
- From the very first day, you'll take on challenging tasks, as well as direct responsibility
- You'll work in a pleasant working atmosphere as part of an international team
- You'll have opportunities for further learning through workshops, as well as the chance to contribute with your own ideas

### Others:

- Availability: Immediate for at least 3 months
- Location: Kuala Lumpur
